ABOUT

Programming has always been a passion of mine, and university has only made that passion stronger. I'm excited to find a company who both shares that passion and encourages me to grow it even further. I am looking for an opportunity to contribute towards a company that makes a difference and shares my values, whilst allowing me to develop and broaden my scope of knowledge within the Software Development sector.

EDUCATION

MSc Computer Systems, Nottingham Trent University
In progress - Completion September 2022

BSc Computing, Nottingham Trent University
2:1 BSc (Hons) | 2018 – 2021

A Levels, John Cleveland College
A Levels in ICT, Applied Science and Public Services | 2016 – 2018

SKILLS

- 1) Web Dev (PHP, JS, Bootstrap, React, Node, Typescript)
- 2) Python
- 3) SQL
- 4) Git
- 5) C# / .NET
- 6) Java & Kotlin

EXPERIENCE

Bartender, Greene King
2020 – 2022

Working at Green King as a bartender provided me with my first professional experience working with customers. Communication, teamwork, collaboration, and leadership were all essential for this role, subsequently leading to great strides in my interpersonal skills, which in turn allows me to start my development career with solid foundations.

Mentor & Classroom Assistant, NTU(CERT)
2019 - 2021

Helping to teach other students programming through one-on-one sessions and classroom teaching allowed me to guide my peers to success, whilst also allowing me to further enhance my own skills. This role developed my critical thinking and interpersonal skills, whilst also giving me insight into knowledge sharing, which is something I will carry forward into my career. Students occasionally brought personal matters to the conversation, which I met with empathy and professionalism.
